

JEDNÁNÍ KR A VR ČNHP

1.11.2022, Brno

Brněnské hematologické dny

Jan Blatný, Zuzana Čermáková, Zlata Kříšťková, Ester Zápotocká,

Program

17:00 Zahájení

1. Zpráva o výsledcích léčby hemofilie v ČR za rok 2021 – data ČNHP (Blatný)
2. Zpráva o auditech center ČNHP (Zápotocká, Blatný)
3. Informace z PedNet (Blatný, Zápotocká)
4. Změny v registru, otázky k datamanagementu (Ovesná)
5. Plán data-monitoringu na rok 2023 (Zápotocká, Blatný, Čermáková)
6. Zpráva o rozpočtu (výdaje/náklady) CNHP za rok 2022 (Blatný)
7. Domluva na standardizaci cen za analýzy požadované po ČNHP komerčními subjekty (Blatný, Kříštková)
8. Aktualizace deklarace CNHP (Smejkal, Zápotocká) – původní text je na webu ČNHP
9. Integrace dětských dat o ITP do registru CNHP ve spolupráci s PSDH – Pracovní skupina pro dětskou hematologii (Blatný)
10. Návrh změny grafiky webu ČNHP (Blatný)
11. Návrhy na akademické analýzy/PhD projekty nad daty ČNHP (Zápotocká, všichni)
12. Různé a diskuse

19:00 Závěr:

Zpráva o výsledcích léčby hemofilie v ČR za rok 2021 – data ČNHP

The status of care for persons with haemophilia registered within CNHP registry

Annual Report 2021

Jan Blatný, Petra Ovesná

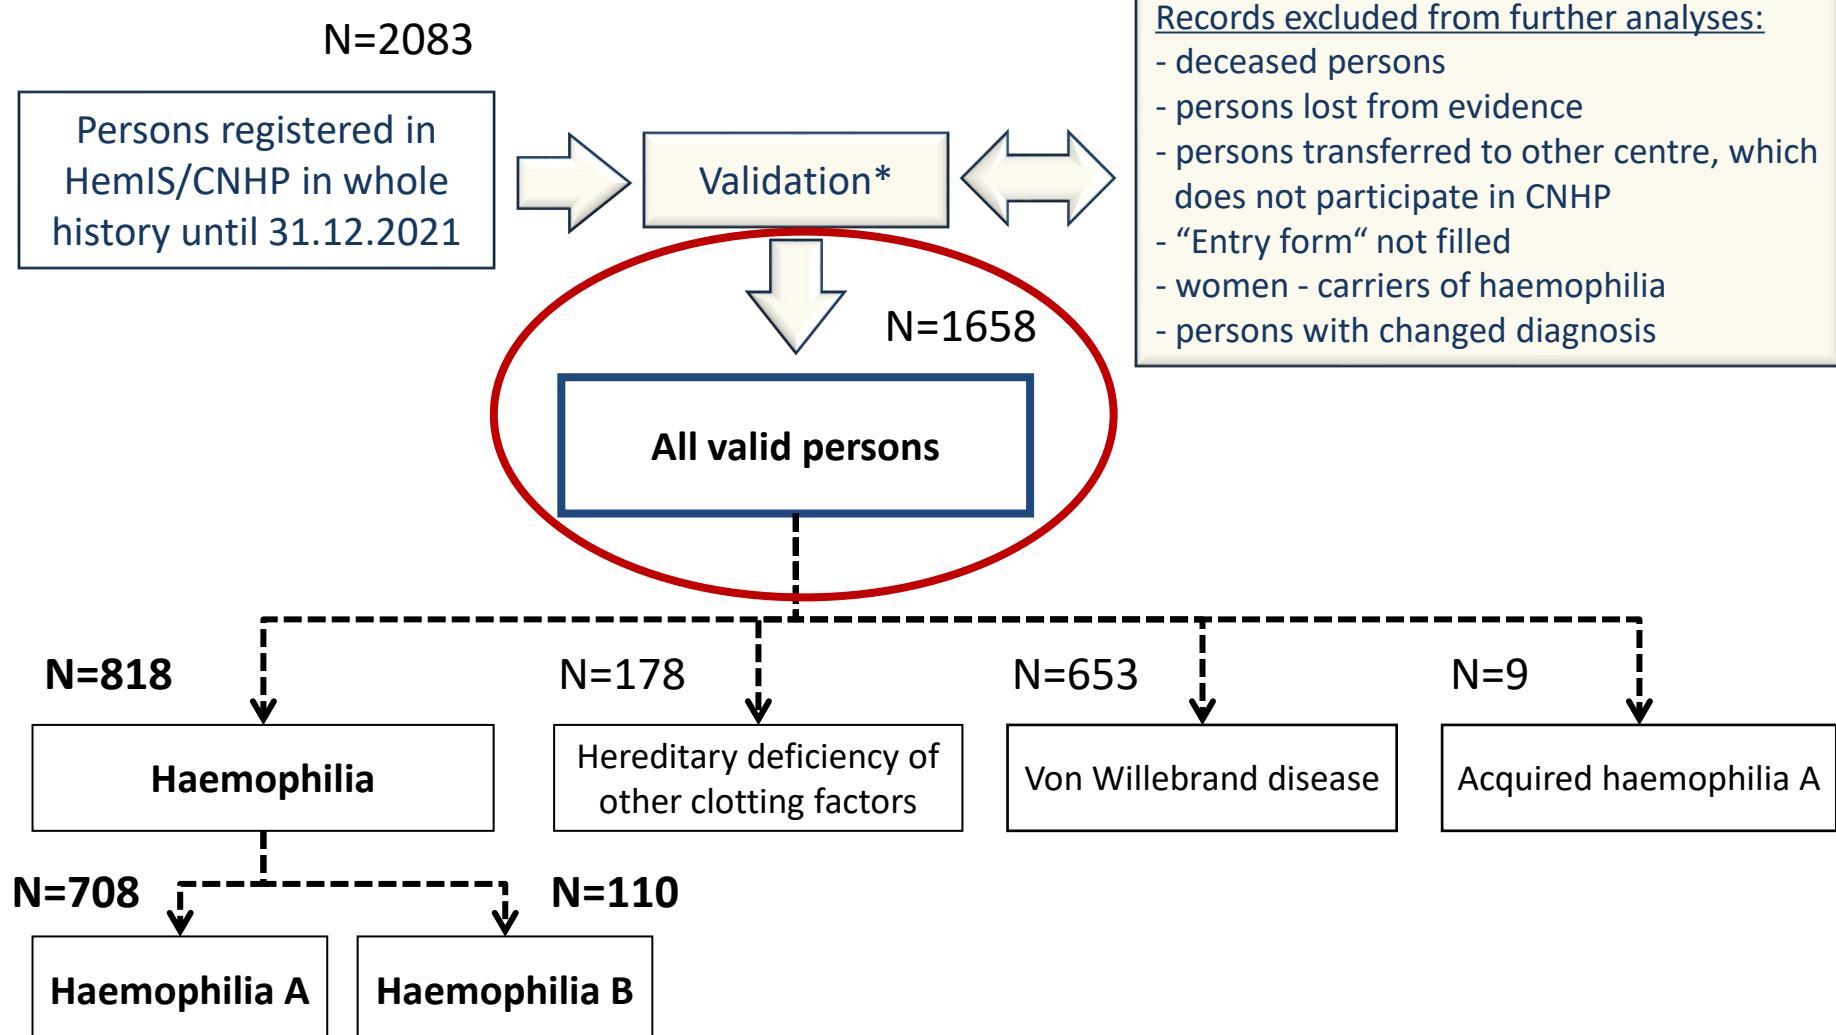

on behalf of

Centres contributing to CNHP registry
(Czech National Haemophilia Programme)

Export date: April 01, 2022

Sample size, valid records

Persons with haemophilia and inhibitors in 2021

Active inhibitors were recorded in 19 persons in the end of year 2021

- 2 inhibitors in children with severe HA and 1 inhibitor in adult with mild HA newly developed in 2021

PWH with inhibitors:

- 11 children and 8 adults
- 18 haemophilia A and 1 haemophilia B
- 15 in severe, 2 in moderate and 2 in mild haemophilia
- 15 high-titre and 4 low-titre (<5BU)
- 9 high response and 8 low response inhibitors; this information not available in 2 PWH with inhibitors
- **15 patients were treated with emicizumab**
 - 9 patients were treated only with emi, 5 patients with emi and rFVIIa, and 1 patient with emi and rFVIII during the year
- 1 patients was treated only with rFVIIa
- 2 patients were without any „by-pass“ therapy or emi therapy and 1 patient was without any recorded treatment at all

ITT:

- One patient has already been on-going ITT in 2021 (started earlier).
- One patient started ITT in 2021.
- One patient finished ITT unsuccessfully during 2020.

* without inhibitor

² Frequency of bleeding is missing in 1 adult (inhibitor).

Location of bleeds in 2021

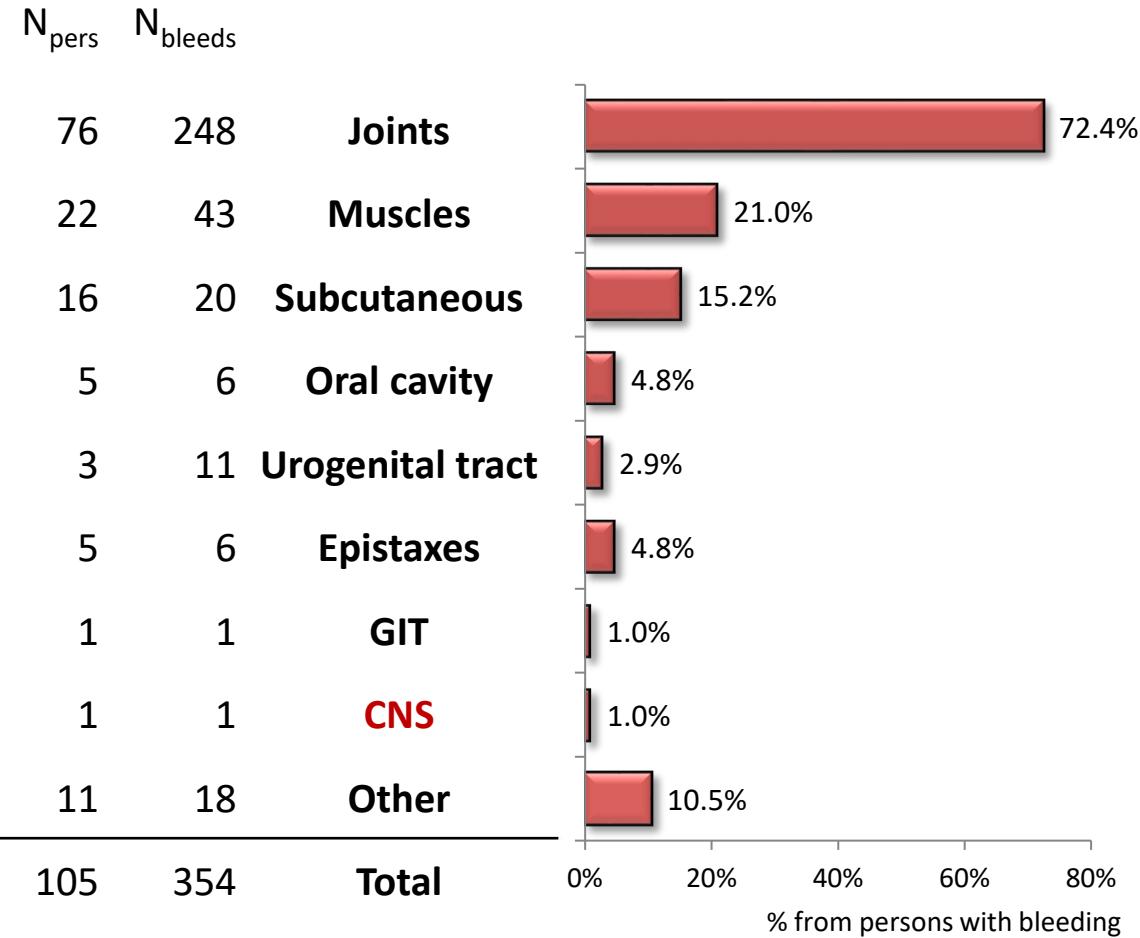

70 (29.4%) children experienced bleeding requiring treatment at least once in year; 133 bleeds were recorded in total, 12 bleeds required hospitalization. 60 of these 70 children have recorded location of their bleeds. Localization is not known in 10 children. 168 (70.6%) children recorded no bleed during year 2021.

Location of bleeds in 2021

Adults
Haem A
N=467¹

108 (23.0%) adults experienced bleeding requiring treatment at least once in year; 354 bleeds were recorded in total, 12 bleeds required hospitalization.
105 of these 108 adults have recorded location of their bleeds. Localization is not known in 3 adults.
361 (77.0%) adults have recorded no bleed during year 2021.

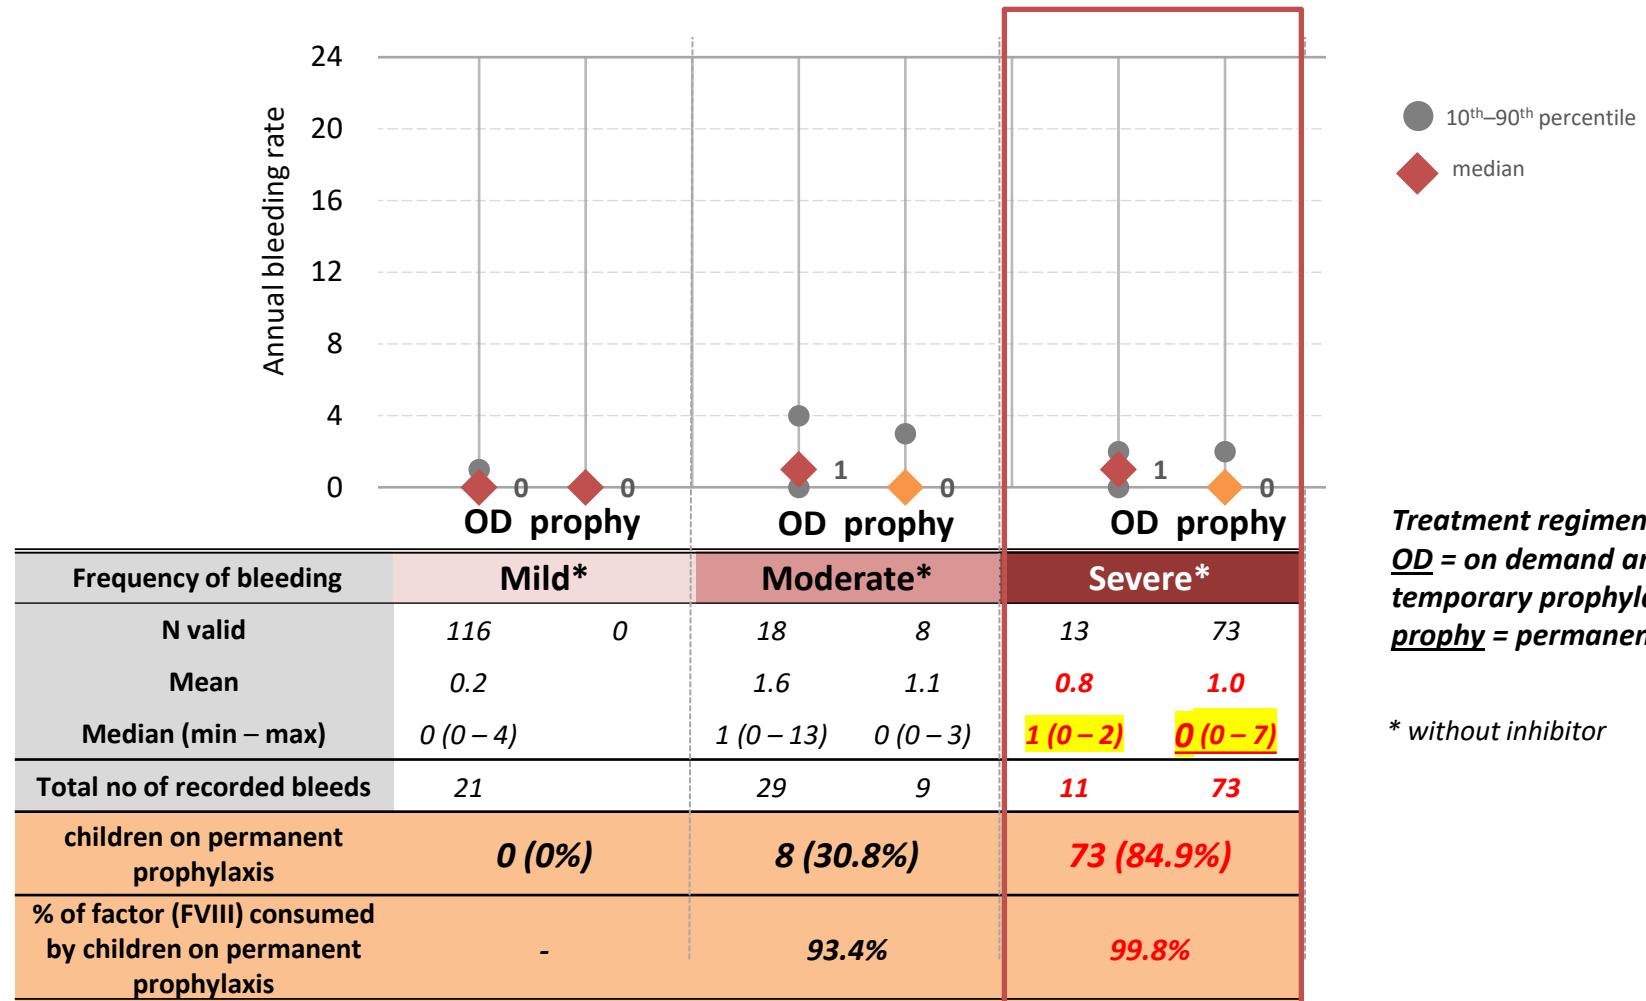

¹Frequency of bleeding is missing in 1 adult.

Treatment data and factor consumption Haemophilia A and B

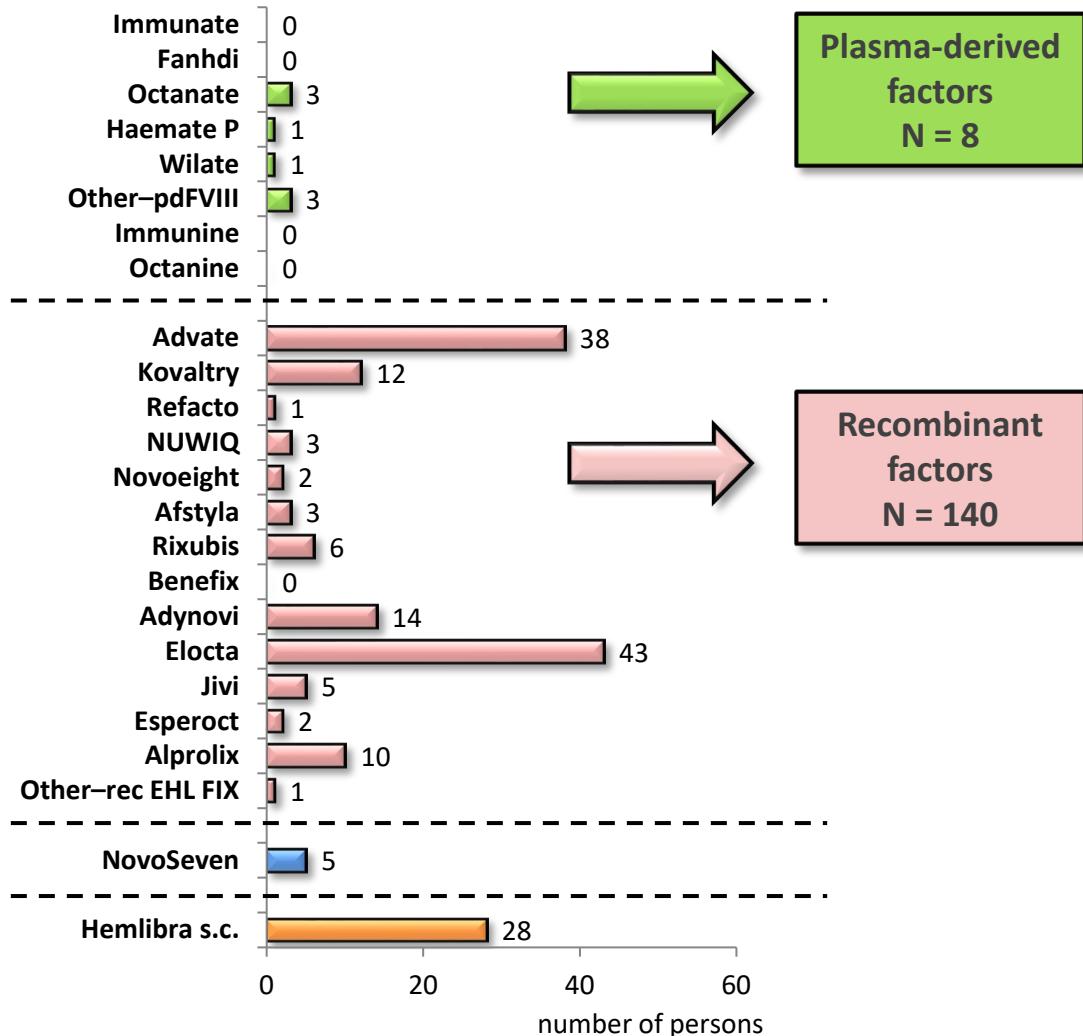

Treatment

422 persons (51.5% of all PWH) were treated in 2021 (264 persons received standard factor concentrates, 157 persons received EHL factors, by-pass therapy or emicizumab, in 1 persons data are not available; 94 persons received more than one type/brand of concentrate). 9 persons were treated with both plasma-derived and recombinant factor.

¹missing type of treatment in 1 child

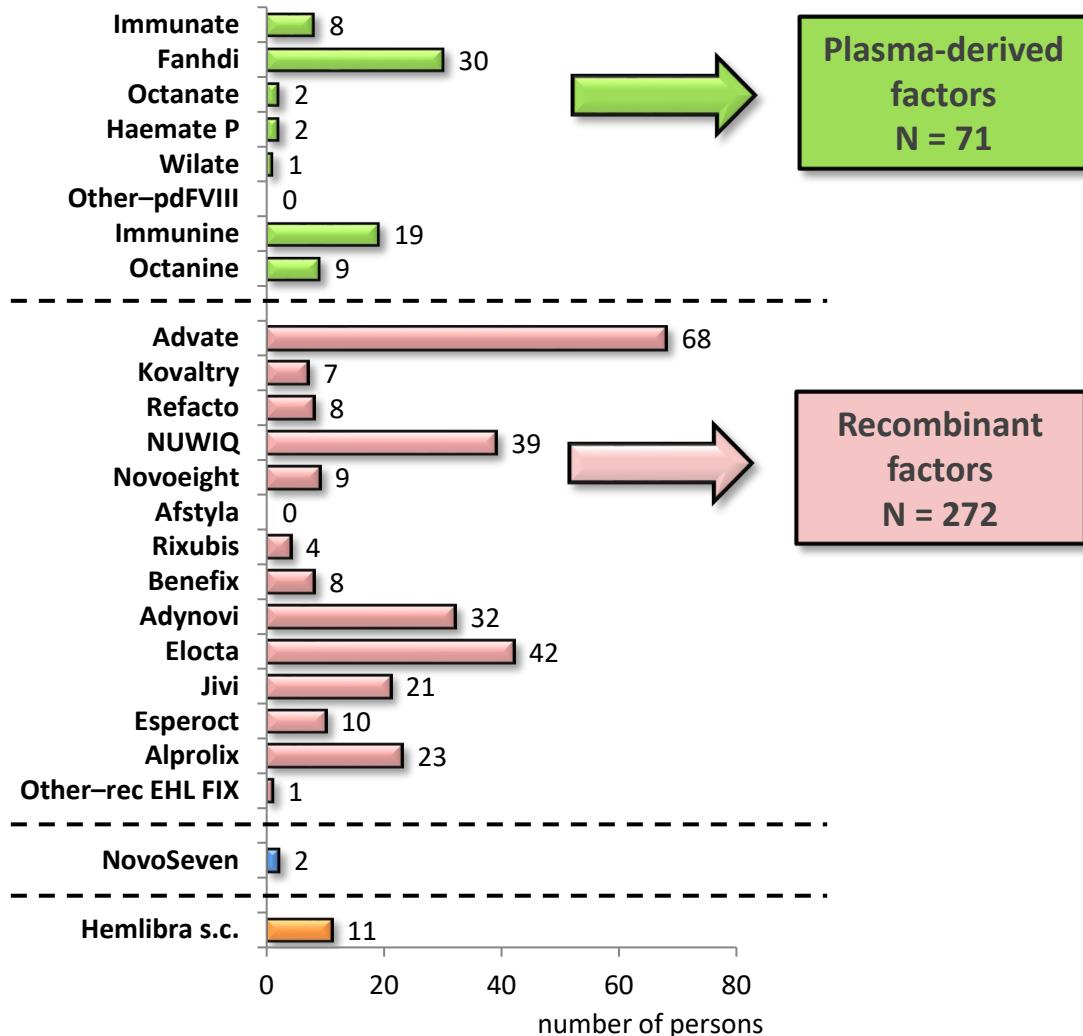

Treatment

139 children (50.2% of all PWH) were treated in 2021 (67 children received standard factor concentrates, 71 children EHL factors, by-pass therapy or emicizumab; 31 children received more than one type/brand of concentrate). None child were treated with both plasma-derived and recombinant factor.

¹missing type of treatment in 1 child

Treatment

283 adults (52.1% of all PWH) were treated in 2021 (**197 adults received standard factor concentrates**, 86 adults EHL factors, by-pass therapy or emicizumab; 63 adults received more than one type/brand of concentrate).
9 adults were treated with both plasma-derived and recombinant factor.

Zpráva o auditech center ČNHP

Audity proběhly ve všech centrech říjen 2021- duben 2022

Závěry: certifikáty od 1.1.2022 pro všechna centra, ALE NOVĚ:

- změny v Hradci Králové

- dospělé centrum neauditováno (nyní na vlastní žádost mimo ČNHP)

- dětské centrum nově/dočasně jako Centrum přidružené péče k CCC (Praha/Brno – spádově dle preference rodiny) – tj. aktuálně nesplňuje počty pacientů pro HTC a taktéž aktuálně chybí dostatečné personální zajištění – nově: všechny nové diagnózy, zahájení/výběr léčby, plánování a zajištění výkonů, dispensární prohlídka 1 x ročně v gesci CCC. V HK i nadále aplikace faktoru, aktuální řešení krvácení aj.

- připomínka pro všechny: vhodné zajištění aktualizovaných souhlasů s domácí léčbou zohledňující SC aplikaci (Hemlibra)

- K diskuzi: frekvence auditů – viz deklarace: prodloužení certifikátu bez auditu možné max. na 2 roky, jinak mezi audity 4 roky

Informace z PedNet

- Dvě dětská centra ČNHP (Brno a Praha) se staly členy PedNet
- PedNet ocenuje kvalitu a včasnost zadávání dat z českých center
- PedNet uvažuje o rozšíření na některé další dg (probíhá dotazníková akce)
- Od roku 2020 jsou součástí dat (a tím i publikací) PedNet česká data
- FN Brno poskytla na PedNet institucionální podporu pro sběr dat

Změny v registru, otázky k datamanagementu

- Přidání nepovinné skupiny k hladině emicizumabu

The screenshot displays two stacked panels from a medical application. The top panel is titled 'AKTUÁLNÍ LÉČBA FAKTOROVÝMI/NEFAKTOROVÝMI DERIVÁTY'. It contains several input fields: a dropdown for 'Typ' (Type) set to 'Emicizumab', another dropdown for 'Typ preparátu' (Preparation type) set to a dash, a dropdown for 'Specifikace' (Specification) set to 'Hemlibra s.c.', a text input for 'Specifikujte jiný' (Specify other), a text input for 'Kumulativní dávka za rok' (Cumulative dose per year) containing '6240', and a dropdown for 'Jednotky' (Units) set to 'mg'. The bottom panel is titled 'FUNKČNÍ HLAĐINA EMICIZUMABU'. It has two input fields: 'Datum odběru' (Collection date) and 'Aktuální hladina emicizumabu (ug/ml)' (Current level of emicizumab (ug/ml)).

- Drobné úpravy labelů otázek, názvů skupin nebo tlačítek
- Přidání tlačítka na přenos (hmotnosti, infekcí, expozičních dnů)
- Přeskádání skupin otázek, aby na sebe navazovaly

Plán data-monitoringu na rok 2023

- Poslední data monitoring proběhl v roce 2017(?)
- Proto vhodné naplánovat pro rok 2023
- Opět potřeba vybrat vhodné auditory (ideálně z těch, kteří zadávají data) – prosím o návrhy za jednotlivá centra do konce roku 2022 !!!
- Realizace ideálně v průběhu jara 2023 – tak, aby byl audit ukončen do začátku léta 2023.
Detailní plán bude vytvořen systémem doodle s ohledem na možnosti auditorů
- Dnes prosíme o to, aby se auditori přihlásili, bude opět honorováno

Aktualizace deklarace ČNHP

- Deklarace ČNHP je původní
- V principu není třeba deklarace projektů měnit
- Došlo nicméně k některým změnám, zejména v léčbě, názvu atestací, počtu CCC a podobně
- Proto navrhujeme aktualizaci (nikoli principiální změnu) deklarace
- Kolektiv Smejkal, Zápotocká, Čermáková, Blatný připravili návrh změn, který byl rozeslán předem
- Dnes bude třeba hlasovat o jeho schválení

Integrace dětských dat o ITP do registru ČNHP ve spolupráci s PSDH

– Pracovní skupina pro dětskou hematologii

- Rozšíření registru ČNHP o danou dg
- Zatím jen pro dětská centra PSDH
- Probíhá jednání s komerčními partnery stran podpory této možné budoucí části registru ČNHP
- Datamanažer stejný/jiný
- Bude procesováno odděleně od vrozených koagulopatií
- Přidání ITP neovlivní stávající sběr dat o vrozených koagulopatiích (ani finančně)
- Partnerem pro analýzy – IBA s.r.o.

Návrh změny grafiky webu ČNHP

- Web zastaralý, neintuitivní
- Připravujeme nový grafický návrh i nové programování celého webu
- Po obdržení cenové nabídky a představení návrhu budou centra oslovena (hlasování/schválení)
- Mutace i v AJ
- Cílem zjednodušení, větší viditelnost v rámci internetu, konkurenceschopnost, PR
- Větší vytěžení existujících dat
- Přátelštější prostředí
- Dnes je třeba (pouze) schválit tento záměr

Návrhy na akademické analýzy/PhD projekty nad daty ČNHP

- Prosíme centra o návrh takových projektů/analýz na rok 2023
- Bud nyní nebo do konce měsíce emailem

Všem účastníkům a hostům

Děkujeme za pozornost
